# OUR MIXED BAG LODGE

## OUR FOUR FEATHERS COMBINATION

***La Quebrada Lodge offers excellent Duck, Perdiz, Pigeon and dove options. Days start early with the wakeup call of the owners. The drive to duck hunting spots can take 5 to 45 minutes depending on water conditions and level. During the afternoons, you will also enjoy ducks or perdiz shooting over pointer dogs in rich pastures at areas nearby (there is always an extra on shooting the abundant European hares while perdiz hunting). Dove & Pigeon shooting is also an option by afternoons as these birds have overpopulated the area in recent years and it is possible to shoot between 10 to 20 boxes per shooter in one afternoon. They are always present at the traditional estancias forests that surrounds our locations.***

# WATERFOWL MIX

## HIDDEN SPOT WITH TOP CLASS DUCK HUNTING

***The duck season takes place from May until the early August Our mixed-bag Lodge "La Quebrada" offers excellent waterfowling. Away from the crowded corridors, we assure a unique duck shooting experience for the discerning hunter. Duck program enhanced by the a superb mixed bag add-on of perdiz, pigeon and doves. Shooting is done at baited lagoons specially selected and prepared prior to the season. The Lodge is located in a croplands area with ponds, depressions, lagoons and marsh lands, the ideal habitat for ducks. Our guests will taste the best duck waterfowling in a super exclusive & personalized Estancia attended by its owner and it's staff. The repeating rate of clients is the trademark of this exclusive location ideal for small and mid size groups.***

# THE PARTRIDGE MIX

## EXCELLENT PERDIZ OVER POINTER DOGS

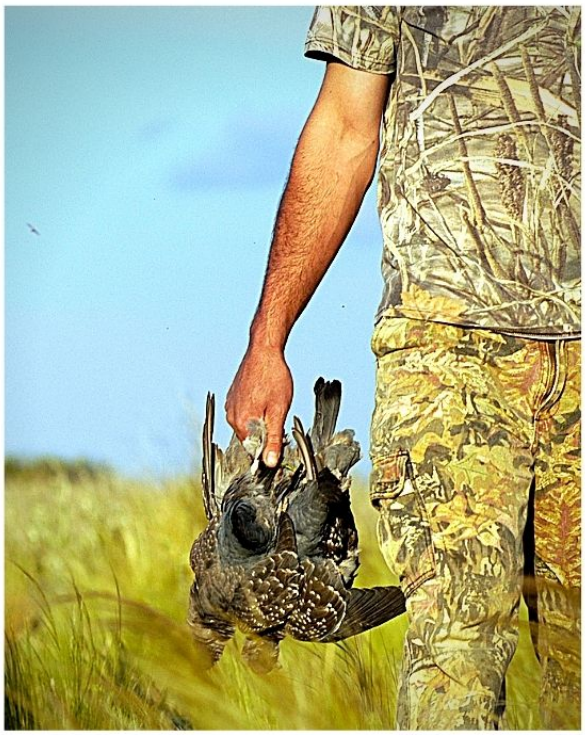
***The ideal moments to hunt partridge are by mid-morning (after the duck shoot) and during the afternoon until sunset. For this style of shooting, hunter will be assisted by trained dogs of various breeds such as English Pointers, Setters, German Pointers and Brittany Spaniels.***

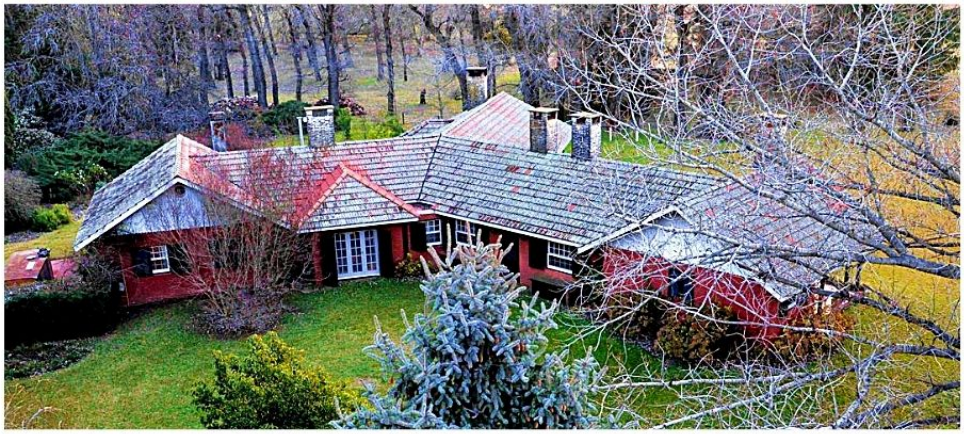
***Our dogs walk the pasture fields seeking out the scent of the partridge, which is usually very well camouflaged. Usually searching against the wind so that the partridge can neither smell nor hear either the hunter or his dog. When your 4 legs trained assistant detects the strongest scent of the bird, the well-known "point" occurs, where the dog indicates to the hunter the exact direction in which to find the quarry. Waiting by your side, for the partridge to take flight.***

# DOVE & PIGEON MIX

## AFTERNOONS AT BIRDS FLYWAYS

***Depending on the blind position, you will be able to experience a full range of targets from birds coming at you at head height to ones that look so out of range that you have to be prompted to shoot at them. There will be a predominance from one direction, almost as if they are being driven. Birds can come in both singles and pairs but certainly not in large flocks. Dove and pigeon shooting has its peculiarities and is different to that of duck and partridge. In general, it is carried out with the shooter positioned behind some coppice, but it can be done in the middle of a field using movable blinds especially designed for the purpose. The scouting of the birds routes is a continuous process. The 20-bore shotgun is one of the most used for dove and pigeon shooting.***





# "SAN MARTIN LODGE DELIVERED NON STOP ACTION FOR 2 GENERATIONS OF HUNTERS, AND STILL COUNTING"

***"San Martin Lodge is essentially a luxury boutique hotel. It is a two levels with four bedrooms, each with private bath; a very comfortable social room where shooters enjoy abundant appetizers by tireside and tell lies about all the great shots they made during Happy Hour prior to a gourmet luncheon or dinner; an elegantly furnished dining room; a very large well-equipped kitchen and a large porch/verandah where shooters may relax in the sun during the little free time when they are not shooting or eating."***
